pawelmarszalek.onrender.com

// PROFILE

Finance analyst with over 8 years in international accounting operations (subledger, GL reconciliations, AP/P2P, AR) who also builds the tools the work needs. Day to day: account and broker reconciliations, multi-currency payment runs, month-end close and SOX controls. Alongside: Python modules, SQL queries, VBA macros and browser scripts for ERP systems (Tampermonkey/JavaScript) that remove manual data entry and speed up financial reporting.

// PROFESSIONAL EXPERIENCE

Subledger Data Analyst — Fintech, Warsaw, Poland `12.2025 – PRESENT`

- Reconcile subledger databases to general ledger balances daily and monthly, finding and resolving transactional discrepancies across high-volume datasets.
- Reconcile multi-currency accounts and statements with external brokers and liquidity providers, investigating settlement differences, commissions and FX adjustments for month-end reporting.
- Write Python modules, interactive Streamlit tools and MS SQL queries that automate data matching, exception reporting and routine accounting checks.
- Build and maintain internal tools and VBA macros that replace repetitive manual spreadsheet work in daily finance operations.

AP Accountant — Bausch & Lomb, Warsaw, Poland `04.2025 – 11.2025`

- Ran daily Accounts Payable operations in PeopleSoft: high-volume invoice posting, GL coding verification and vendor account reconciliations in compliance with SOX controls.
- Prepared, verified and executed multi-currency payment runs, coordinating with Treasury and resolving payment blocks and discrepancies before period-end cutoff.
- Built Python scripts and JavaScript userscripts (Tampermonkey) running directly in PeopleSoft to automate repetitive data entry and speed up document processing.
- Audited and processed employee Travel & Entertainment expenses in SAP Concur and Citibank corporate card workflows as part of month-end close.

AP Coordinator — Foot Locker, Utrecht, The Netherlands `08.2021 – 03.2025`

- Managed daily Procure-to-Pay workflows across European entities: ledger postings, month-end accruals and SLA compliance.
- Performed vendor balance reconciliations and payment validations; primary point of escalation for accounting discrepancies and audit inquiries.
- Created automated reports and MS SQL Server queries tracking transaction volumes, aging balances and reconciliation status.
- Administered expense and payment platforms (Pleo, Spendesk, SAP Concur), supporting period-end close and data integration between departments.

Accounts Payable Specialist — CBRE Corporate Outsourcing, Warsaw, Poland `07.2019 – 07.2021`

- Performed end-to-end vendor account reconciliations, ledger postings and multi-currency payment preparation for international corporate clients.
- Worked within internal SOX control frameworks and prepared documentation for internal and external financial audits.
- Investigated and resolved unreconciled items, aged balances and billing inquiries together with procurement and tax teams.

Accounts Receivable Analyst — Accenture Operations, Warsaw, Poland 04.2018 – 07.2019

- Reconciled bank ledgers and customer accounts to keep cash application and the balance sheet accurate.
- Analysed transactional discrepancies, managed order-hold releases and verified VAT compliance across multi-entity invoicing.
- Worked with banking partners and regional finance teams to clear unallocated cash and meet monthly close deadlines.

// AUTOMATION & SOFTWARE PROJECTS

LEDGERLY — bank-to-ledger reconciliation · live demo: pawelmarszalek.onrender.com/demo
Web app (Python, FastAPI, HTMX) that reads bank statement PDFs, posts them to the ledger, reconciles bank to books line by line and walks through the accruals close. A public rewrite, on fictional data, of a tool I built for my own finance work.

DATANOTER — document data extraction
Python/Streamlit application that uses LLMs and OCR to extract structured data from legal and financial documents.

VETONCO CRM — workflow engine
Operational tool built with Python and AI APIs that automates document triage, data routing and reporting schedules.

// SKILLS

Accounting & R2R	GL and subledger reconciliations · broker and bank balance matching · month-end close, accruals and account analysis · invoice processing and multi-currency payment runs · SOX controls and external audit support
ERP systems	PeopleSoft, SAP, Oracle, Comarch
Databases	MS SQL Server, T-SQL, SSMS
Code & automation	Python, VBA, Selenium, Tampermonkey (JavaScript), Streamlit, Git
AI & documents	OCR / IDP, LLMs (Gemini, Claude)
